EDUCATION

Nanyang Technological University, Singapore

Aug 2021 – Jul 2025

Bachelor of Engineering (Computer Engineering)

- Dean's List for AY 2021/2022 and 2023/2024, ASEAN Scholar
- Honours (Highest Distinction), CGPA: 4.65 / 5.00

SKILLS

- **Frontend Development:** ReactJS, HTML, CSS, Javascript, Typescript, Vue, ECharts, Ant Design, Material UI
- **Backend Development:** Python, Flask, NodeJS, ExpressJS, C, C++, Java, SQLite
- **DevOps & CI/CD:** Git, Docker, Kubernetes, Jenkins, GitHub Actions, AWS
- **Others:** PyTorch, Huggingface, transformers, Tensorflow, scikit-learn, Embedded C Programming, Bash
- **Languages:** English, Mandarin Chinese, Malay
- **Soft Skills:** Strong problem-solving, fast learner, clear communicator in agile teams

WORK EXPERIENCE

Leoch Battery Pte. Ltd.

Jul 2025 – Present

Frontend Software Engineer

- Developed and maintained reusable React components and responsive pages for ESS web applications (desktop & tablet)
- Built and bundled applications using Vite, improving development speed and build efficiency
- Built standalone desktop applications using React and Electron.js
- Worked independently while collaborating with cross-functional teams via JIRA in an agile environment

Univers Pte. Ltd.

Jan 2024 – Jun 2024

Frontend Software Engineer Intern

- Developed reusable UI components and refactored large-scale frontend codebases with React
- Integrated data visualisation using Apache ECharts and UI frameworks such as Ant Design
- Collaborated within a distributed agile team, managing tasks and bugs through JIRA
- Deployed applications to pre-production environments using Jenkins, Docker, Kubernetes, and an in-house deployment portal

RELEVANT ACADEMIC & PERSONAL PROJECTS

Nanyang Technological University, Singapore

Aug 2024 – May 2025

Full Stack Web Application Development of Chatbot – Final Year Project

- Designed and developed a full stack chatbot application with ReactJS frontend and Node.js / Express.js backend
- Built an AI chatbot engine using Python Flask and Hugging Face pre-trained LLMs for natural language understanding, contextual awareness, and response generation
- Implemented secure RESTful APIs to integrate AI services with frontend and backend systems
- Containerised services using Docker and deployed on AWS, enabling scalability and CI/CD integration
- Optimised performance through efficient server-side logic and database management strategies

Personal Website Development

- Built and deployed a personal portfolio website using React and Material UI, featuring reusable components and project showcases

Nanyang Technological University, Singapore

Jan 2023 – Apr 2023

Frontend Web Application Development for Restaurants Recommendation

- Developed a React-based web app for searching and displaying 100+ restaurants, integrated with a MongoDB-backed API
- Led development to deliver the project over one week ahead of schedule; contributed ~40% of total effort

Nanyang Technological University, Singapore

Aug 2023 – Nov 2023

Embedded Program Development for Autonomous Robot Car Navigation

- Developed Embedded C firmware on STM32 (FreeRTOS) and integrated with Raspberry Pi for autonomous obstacle navigation
- Debugged and optimised Python computer vision and pathfinding algorithms
